### Connecting Essential Workforce Families to Child Care

The Department of Children and Families (DCF) has launched two new tools to help connect [essential workforce](#) families to local, safe child care. Healthcare workers and essential employees are now able to submit a [request for care](#) through the department's updated Child Care Finder or proactively view up-to-date availability across the state using the department's new [child care map](#).

Providing child care to the essential workforce is critical to flattening the curve of COVID-19 in Wisconsin. Child care centers across the state are staying open to support essential workforce families. Individuals and organizations should consult the DCF map to identify available child care in their area. Essential workforce employees can connect directly to the child care center. Employers can also direct their essential workforce employees to DCF's Child Care Finder request form to submit their request for child care in their area.

The employee ID letter identifies you as an essential worker and was mailed over the weekend to carry with you as you travel to/from work, If you did not receive the letter by Wednesday, please contact your supervisor.
